GOVERNOR DIXY LEE RAY

I am pleased to present the 1979 update of the Washington State Pocket Databook. This volume provides, in handy reference form, the commonly needed statistics and trends concerning our state and its government.

Special thanks are due to the many individuals and organizations in state government, federal government, and in the private sector whose cooperation has made this update possible.

POPULATION

POPULATION DATA FOR THE STATE OF WASHINGTON

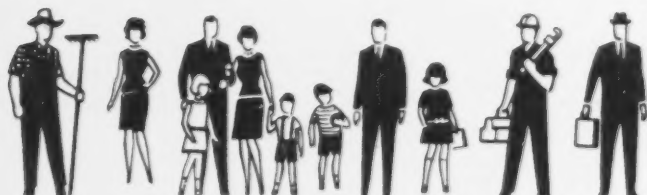

The source of 1970 population data in this book is the federal census. Current official estimates of the Washington population are taken from *Population Trends*, published annually by the Office of Financial Management.

This agency has statutory responsibility for preparing annual estimates of population for the counties and incorporated places in Washington. These estimates are established by law as the basis for distribution of revenues and the implementation of all statutes which specify population as the basis for official action. They are also widely used by public and private agencies for planning purposes.

Annual estimates are made as of April 1st of each year. Cities and towns which choose to conduct actual censuses of their population are provided with materials and instructions by the Office of Financial Management. When the conduct of the census has been approved by this office, its results are used in place of the official estimates.

Copies of *Population Trends* for the current year may be obtained from:

NOTES CONCERNING DATA SHOWN ON THE FOLLOWING COUNTY PAGES

State Revenues For Distribution:

N/A means that the law does not provide for a distribution as indicated.

Employment Covered by the Employment Security Act:

ESB 2480, passed by the 45th Legislature, extended employment insurance coverage to virtually all agricultural, domestic and government workers who were not previously covered. This change, which became effective on January 1, 1978, resulted in a major increase in the number of workers in these categories.

Public Assistance Programs:

Reports money grants and recipients, also, data for Aged, Blind and Disabled reflects only state supplementation of federal grants which are the major portion of these programs. This causes a slight understatement of the number of recipients, but amounts shown are only those disbursed by the state.

NOTE: DATA TO UPDATE THIS SECTION WAS NOT AVAILABLE AT PRESS TIME.

Public Schools:

Gross Operating Budget is the total budget of all districts with headquarters in the county, including joint school districts whose boundaries cross county lines.

Net Operating Budget is the sum of those costs defined by the Superintendent of Public Instruction as directly applicable to the education of all students. It excludes such expense as food services, education of the handicapped, special programs for minorities, etc. but includes transportation.

Collection of entire amounts of special levies approved by voters shown here will not be necessary because the Appropriations Act of 1979-81 provides full funding for basic education.
